Interest Classes

Sport Climbing

SuperKid's sport climbing courses are tailored for children aged from 4 to 12 and are well-developed with 10 progressive levels of difficulty. They focus on physical and mental development to train up both the body and soul. Children get physically fit by having good coordination and flexibility, while their mind will also be drilled to be capable and persevering, helping them to successfully cope with the ever-changing society. With our provision of excellent venues, training equipment, well-established examination mechanism and close communications with parents, over 1,500 children have participated in SuperKid's climbing courses since 2001.
